Quon Fujin put to the test in Hokkaido

UD Trucks successfully demonstrated Level 4 autonomous driving technology over the span of three weeks at a sugar refining mill in Hokkaido, an important initiative that can help address a shortage of truck drivers.

The team behind Quon Fujin

Meet five engineers who are dedicated to the development of autonomous driving at UD Trucks. Learn how they overcame challenges to build a fully running prototype and the possibilities that lie ahead.

Customer story South Africa

"Questers have made a huge difference in our operation compared to other models."

Clayton Fischer, Operational Manager, SA Metal

Did you know

The Foretrack function on ESCOT-VI transmission can remember every slope you drive and program optimized fuel-efficient gear changes and drive those slopes for you next time.

UD History

Leading Japan into the expressway era

Conceived when most roads in Japan were still unpaved, 6TW was born in the moment the country needed it the most, and has become a legend in Japan's booming era of infrastructure construction.

UD at Tokyo Motor Show

UD Trucks showed how INNOVATION FOR SMART LOGISTICS will create a better world with solutions for today, tomorrow and the future.

OPEN FUTURE TOKYO MOTOR SHOW 2019
October 24 November

Re-imagining the truck of the future

Quon Concept 202X will be intricately connected to its surroundings, including other trucks, infrastructure and people, achieving new levels of efficiency, productivity, safety and sustainability. This prefiguration of a truck of the future employs various cutting-edge technologies including AI, personalized displays and camera monitoring systems.

Automation and electromobility for tomorrow

Part of our Fujin & Raijin - Vision 2030 innovation roadmap, on display were the Fujin Automation Demonstrator, the same vehicle used in Japan's first Level 4 autonomous driving trial in Hokkaido and the Hybrid Raijin Electromobility Demonstrator, which maximizes payload and power while drastically reducing noise and emissions.

Explore the UD range of trucks for today

Visitors could feel and touch Quon, UD's flagship heavy-duty truck, and New Quester, now equipped with the renowned ESCOT transmission. Designed with people in mind, they excel in all the essentials of today's smart logistics operation: drivability, fuel efficiency, safety, productivity and uptime.
